

BOSCH LAUNCHES FLEXIBLE, LOW-PROFILE, LONG RANGE CEILING MOUNT PASSIVE INFRARED MOTION DETECTOR

June 20, 2007

Fairport, N.Y. -- Bosch Security Systems, a full-line manufacturer of high-quality security solutions, has launched the Bosch ISN-CC1-100N motion detector. This Passive Infrared (PIR) ceiling-mount motion detector offers many new features.

The UL-listed detector has a lower-profile design that is less than two-thirds the height of the previous model, so it's less obtrusive and ideal for applications and environments where aesthetics are important.

Its adjustable mirrors make it easy to change coverage patterns. Vertical adjustment is done using a lever with indications for matching the ceiling height, so there is no visual alignment required. The ISN-CC1-100N has long-range coverage of 100 feet.

The unit offers several other advantages over previous models, including a higher ceiling mounting height – positioning from eight to 16 feet, a covered tamper switch, and normally closed (NC) or normally open (NO) alarm relay configuration with a silent, solid-state Form 1a/1b relay for more secure operation. The ISN-CC1-100N is self-monitoring, which ensures proper installation and operation, and the alarm LED flashes to indicate any problems.

The unit's DIP switches allow users to select settings for LED (On/Off) and Relay Output (NC/NO). To help reduce false alarms, the DIP switches also let users choose the sensitivity level - 60, 80, 100, or 120%.

About Bosch Security Systems, Inc.

Bosch Security Systems, Inc. is a leading supplier of equipment for the global electronic protection and communications systems industries. With worldwide sales in 2006 exceeding \$1.7 billion and more than 10,300 employees in 45 countries, the company designs, manufactures and markets equipment for security, video surveillance, life safety and communication, professional audio, and personnel and asset tracking applications.

In North America, the Bosch Group manufactures and markets automotive original equipment and aftermarket products, industrial automation and mobile products, power tools and accessories, security technology, packaging equipment and household appliances.
