

## **BOSCH EXPANDS PORTFOLIO OF LCD MONITORS WITH 19-INCH HIGH PERFORMANCE COLOR MODEL**

May 1, 2007

**Fairport, New York** – Bosch Security Systems, Inc., a full-line manufacturer of high-quality security systems solutions, introduces its newest high performance flat screen LCD color monitor, MON192CL10, designed for a wide range of closed circuit television (CCTV) security applications. The new monitor features dual looping composite video and audio inputs and picture-in-picture for simultaneous monitoring of multiple areas. The design of the monitor allows exceptional, consistently crisp picture quality and avoids image degradation experienced with aging cathode ray tube (CRT) displays. In addition, the new model includes an analog VGA / digital DVI input to accommodate the increasing use of PCs and digital video devices in security applications.

The newest monitor includes on-screen menus in several languages, front panel controls and a lockout feature that disables the front panel control buttons. The compact styling and narrow depth (three inches/84 mm) enables the MON192CL10 to fit easily in small spaces on desktops, wall mounted or rack mounted. The monitor has a wide viewing angle – 178 degrees horizontally and vertically – so the image is viewable clearly regardless of its placement. Easy to install and set up, MON192CL10 consumes 50 percent less power than a conventional CRT monitor and includes both DVI-to-VGA and DVI-to-DVI cables.

Bosch offers a complete portfolio of general purpose and high performance monitors that provide high quality images for virtually every application and environment where security surveillance is required. The economical flat-screen LCD color general purpose monitor line includes MON150CL 15-inch monitor, MON170CL 17-inch monitor and the MON201CL 20-inch monitor. In addition to the new 19-inch monitor, other high performance models include MON152CL30, a 15-inch monitor and MON172CL20, a 17-inch monitor.
