

BOSCH UPGRADES POPULAR G SERIES CONTROL PANELS FOR ANSI CP-01 COMPLIANCE

February 14, 2007

Fairport, New York – Bosch Security Systems, Inc., a full-line manufacturer of high-quality security systems and components, has upgraded its G Series Control Panels to meet the requirements of the American National Standards Institute (ANSI) CP-01 Control Panel Standard – Features for False Alarm Reduction. This new release of firmware (v7.05) may be installed in any D7212GV2, D7412GV2, or D9412GV2 control panel to bring it into compliance.

ANSI'S CP-01 Control Panel Standard is the industry benchmark for false alarm reduction and was created in cooperation with industry associations and control panel manufacturers. The V7.05 firmware release for Bosch's G Series panels underscores the company's on-going commitment to providing products that reduce false alarm problems for our customers.

The G Series Panels include three models – D7212GV2, D7412GV2 and D9412GV2 – that address the needs of a wide range of applications. All G Series Panels are scaleable, easy to use and give the user virtually limitless control and flexibility.
