

BOSCH UPGRADES ALLEGIANT VIDEO CONTROL SYSTEM FOR SUPERIOR PERFORMANCE AND RELIABILITY

January 8, 2008

FAIRPORT, N.Y. – Bosch Security Systems, Inc., a full-line manufacturer of high-quality security solutions, announced today the upgrade of its LTC 8900 Series Allegiant Video Switcher/Control System with the introduction of a new PC platform that delivers higher security, greater processing power and enhanced reliability.

The LTC 8900 Series Allegiant is now based on the Windows® XP operating system for support of Microsoft's latest security features. The new PC platform also offers a Solid State hard drive, which provides greater reliability over magnetic hard drives. By upgrading to a Solid State hard drive, Bosch aims to better protect customers' investments in the Allegiant system, which is already recognized for its dependability – functioning consistently for up to 15 years in many installations.

A flexible and scalable system, the LTC 8900 Series Allegiant supports more than 6,000 camera inputs, 512 monitor outputs and up to 120 keyboards to meet the requirements of a wide range of customer applications. The powerful full matrix switcher now offers greater processing power and can display video from any camera on any monitor connected to the system as well as provide control of PTZ camera capabilities.

The upgraded switcher/control is backward compatible with all installed LTC 8900 Series systems and uses the same amount of rack space as its predecessor – giving end users the option to easily upgrade their existing systems.

About the Bosch Group

The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 271,000 associates generated sales of 46.3 billion euros (over \$63 billion) in fiscal 2007. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in roughly 50 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than three billion euros for research and development, and applies for over 3,000 patents worldwide. The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as “Workshop for Precision Mechanics and Electrical Engineering.”

In North America, the Bosch Group manufactures and markets automotive original equipment and aftermarket products, industrial automation and mobile products, power tools and accessories, security technology, thermo-technology, packaging equipment and household appliances. Bosch employs approximately 25,000 associates in more than 80 locations throughout the U.S., Canada and Mexico, with reported sales of \$9.5 billion in fiscal 2007.
