

Bosch Detector Helps Authorities Catch Intruder at Kansas City Community Center

March 2, 2009

Fairport, N.Y. – Bosch Security Systems, Inc., a full-line manufacturer of high-quality security solutions, announced today that its DS9370 Series Ceiling Mount Detector recently helped customer Jade Alarm Co. and the local authorities apprehend an intruder at the Whatsoever Community Center in Kansas City, Missouri.

The intruder attempted to circumvent the Whatsoever Community Center's first floor perimeter security by scaling an exterior wall and entering the facility on the second floor. Upon detecting motion on the second floor, the DS9370 triggered an alarm to the Bosch control panel securing the premises. Bosch Certified Security Dealer Jade Alarm Co., the system installer and central monitoring station, immediately dispatched local law enforcement personnel to the center.

With the rapid detection of the intruder and response to the alarm, local authorities were able to arrive in time to observe the suspect beginning to leave the premises. As a result, the intruder returned to the community center and attempted to hide in the ceiling, where police promptly located and arrested the man.

“Bosch detectors deliver extremely reliable catch performance, enabling our central station to provide an unsurpassed level of service to our customers,” said Joseph Pfefer, President, Jade Alarm Co. “This alarm event is just one instance where the technology's flawless operation has helped us protect our customers' facilities and assets.”

The DS9370 Series TriTech PIR/Microwave Detector uses several patented processing techniques to provide excellent catch performance with freedom from false alarms. The detector can be mounted on ceilings as high as 25 feet and provides fully adjustable optics for coverage integrity at all mounting heights.

About the Bosch Group

The Bosch Group is a leading global supplier of technology and services. According to preliminary figures, some 282,000 associates generated sales of roughly 45 billion euros in the areas of automotive and industrial technology, consumer goods, and building technology in fiscal 2008. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in over 60 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than three billion euros for research and development, and applies for over 3,000 patents worldwide. With all its products and services, Bosch enhances the quality of life by providing solutions which are both innovative and beneficial.

In North America, the Bosch Group manufactures and markets automotive original equipment and aftermarket products, industrial automation and mobile products, power tools and accessories, security technology, thermo-technology, packaging equipment and household appliances. Bosch employs approximately 25,000 associates in more than 70 locations throughout the U.S., Canada and Mexico, with reported sales of \$9.5 billion in fiscal 2007.
