

## **BOSCH UNVEILS IP RESOURCE CENTER WEB SITE TO EDUCATE THE MARKET ABOUT THE CONCEPTS OF VIDEO OVER IP**

October 9, 2006

*Fairport, NY* – Bosch Security Systems, Inc., a full-line manufacturer of high-quality security systems and components, has launched the IP Resource Center at [www.boschsecurity.us/ip](http://www.boschsecurity.us/ip), one of the first web sites of its kind to provide a comprehensive online educational tool designed to help simplify video over IP technology for systems integrators, end users and consultants.

The IP Resource Center is a one-stop solutions-oriented web portal. It features three sections: a Learning Center, a Design Center and a Support Center. The Learning Center covers topics such as networking, recording at the edge, compression and image quality. The Design Center offers users design templates on a variety of systems, from point-to-point systems and full virtual matrix systems to single camera with DVR recording and multiple camera network recording systems. The Support Center provides a comprehensive listing of frequently asked questions about video over IP.

Users of the IP Resource Center web site will find instructional videos, information on how to combine new technologies with existing installations, handle bandwidth concerns, and access full front and back views of products, such as encoders. Case studies, press releases, datasheets, software and firmware links are also part of the IP Resource Center.

The Bosch IP Resource Center can be viewed by visiting [www.boschsecurity.us/ip](http://www.boschsecurity.us/ip).
