

## **BOSCH INTRODUCES HIGH-PERFORMANCE DIVAR XF DIGITAL RECORDER**

July 2, 2008

**FAIRPORT, N. Y.** – Bosch Security Systems, Inc., a full-line manufacturer of security solutions, is introducing an addition to its Divar family of Digital Versatile Recorders (DVRs). The new Divar XF digital recorder provides real-time viewing, recording and playback in full 4CIF resolution, as well as synchronous audio support on every channel. A leader in video storage technology, Bosch has incorporated state-of-the-art H.264 compression technology into the Divar XF's advanced design. This technology allows Divar XF to deliver outstanding, high resolution images while reducing storage costs by as much as 30 percent compared with systems that use traditional MPEG-4 encoding.

The Divar XF also features four hard disk drives accessible from the front of the unit for easy servicing. Front accessibility means drives can be easily added or replaced with larger capacity drives, providing the flexibility for additional storage when needed. Video can be archived to USB flash drives, and with image authentication, it can be used as evidence in legal proceedings.

The system includes Divar XF Control Center software for complete remote management, including live viewing, playback, configuration, remote alarm notification and easy exporting of recorded video. With the Divar XF Control Center, all operations can be centralized to create a scalable video management solution.

Using the Bosch Video Management System, customers can integrate the Divar XF into any Bosch IP network surveillance system to provide comprehensive, centralized control over an entire CCTV network, including cameras and storage devices. Using Bosch's new VideoSDK (Software Development Kit) enables integration with third-party security management systems or specialized software tools, such as fraud detection programs for retail applications.

The Divar XF is ideal for medium to large or growing systems with high security requirements, such as shopping centers, banks and financial institutions, industrial facilities and airports. It is available in eight and 16 channel models.

For more information about the Divar XF, visit <http://www.boschsecurity.us>.

### **About Bosch Security Systems, Inc.**

*Bosch Security Systems, Inc., a division of the Bosch Group, develops and markets a broad range of products and systems for security, video surveillance, life safety, personnel and asset tracking applications, as well as for communication and professional audio installations. Worldwide, Bosch Security Systems employs nearly 10,800 associates and reported sales of \$2 billion in fiscal 2007. For more information, visit [www.boschsecurity.us](http://www.boschsecurity.us) or call (800) 289-0096.*

## **About the Bosch Group**

*The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 271,000 associates generated sales of 46.3 billion euros (over \$63 billion) in fiscal 2007. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in roughly 50 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than three billion euros for research and development, and applies for over 3,000 patents worldwide. The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as “Workshop for Precision Mechanics and Electrical Engineering.”*

*In North America, the Bosch Group manufactures and markets automotive original equipment and aftermarket products, industrial automation and mobile products, power tools and accessories, security technology, thermo-technology, packaging equipment and household appliances. Bosch employs approximately 25,000 associates in more than 80 locations throughout the U.S., Canada and Mexico, with reported sales of \$9.5 billion in fiscal 2007.
