

BOSCH LAUNCHES LOW-COST IP COMMUNICATIONS RECEIVER FOR MONITORING APPLICATIONS

May 27, 2008

FAIRPORT, N.Y. – Bosch Security Systems, Inc., a full-line manufacturer of high-quality security solutions, announced today the expansion of its Information Transport Solutions portfolio with the Conettix D6100i Communications Receiver/Gateway. The new receiver offers a low-cost point of entry into IP communications for monitoring for small central stations, university campuses or gated communities.

Providing higher security than receivers that only support phone line communications, the Conettix D6100i acknowledges supervision messages from control panels, which helps ensure uninterrupted functionality. The monitoring signals can be sent at a programmed rate ranging from five seconds to 21 minutes to accommodate the differing security needs of various applications. If authentication and encryption algorithms detect potentially damaging activity, such as substitution or replaying of messages, the central station operator is alerted.

By using existing Internet or intranet structures to receive communications, the Conettix D6100i enables higher speed transmissions and helps customers to reduce their system operating costs by eliminating phone lines dedicated for primary communications between control panels and the monitoring station. In addition to integrated IP support, the D6100i offers phone line connections for receiving simultaneous local area network (LAN) or wide area network (WAN) and telephone communications – allowing use of the PSTN for back-up in the event of a network or Internet failure.

The Conettix D6100i can support up to 3200 accounts for LAN or WAN communications, as well as two phone lines, which enable the receiver to accept reports from more accounts than a single-line receiver and results in fewer busy signals -- allowing more data to get through to the central station automation system. Additional features include two programmable inputs and outputs for easy connection to automation systems, programming software and printers, as well as a unique protocol for flexible transmissions through firewalls, and two-way audio support for alarm verification.

The new receiver uses menu-driven keypad programming for simple set-up without special tools, and the large liquid crystal display is easy to read. Its compact design makes the D6100i ideal for installation in crowded service centers or guard shacks, where available space is limited.

About Bosch Security Systems, Inc.

May 27, 2008

Bosch Security Systems, Inc., a division of the Bosch Group, develops and markets a broad range of products and systems for security, video surveillance, life safety, personnel and asset tracking applications, as well as for communication and professional audio installations. Worldwide, Bosch Security Systems employs more than 10,700 associates and reported sales of \$2 billion in fiscal 2007. For more information, visit www.boschsecurity.us or call (800) 289-0096.

About the Bosch Group

The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 271,000 associates generated sales of 46.3 billion euros (over \$63 billion) in fiscal 2007. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in roughly 50 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than three billion euros for research and development, and applies for over 3,000 patents worldwide. The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as “Workshop for Precision Mechanics and Electrical Engineering.”

In North America, the Bosch Group manufactures and markets automotive original equipment and aftermarket products, industrial automation and mobile products, power tools and accessories, security technology, thermo-technology, packaging equipment and household appliances. Bosch employs approximately 25,000 associates in more than 80 locations throughout the U.S., Canada and Mexico, with reported sales of \$9.5 billion in fiscal 2007.
